## TWELFTH NATIONAL CONFERENCE ON PLANNING HISTORY

October 25-28, 2007  
Portland, Maine

For practitioners and historians of planning, the host city for this year's biennial SACRPH conference and NNECAPA's annual conference, Portland, Maine, provides a unique venue for exploring the past, present, and future of urbanism. Maine's premier city, and the economic (if not the political) capital of the state, Portland contains barely 64,000 people. A port city, which still boasts an active fishing fleet and fish exchange, historically the city powered its economy by shipping grain, not fish. As early as the 1870s city boosters capitalized on the city's excellent rail and steamship connections, its Winslow Homer-enshrined rockbound coastline, and its proximity to the Maine woods to herald itself: "Gateway to Vacationland."

Portland's deep, well-protected harbor potentially rivaled Boston. In 1775 the British Navy, under Henry Mowat, eyeing the strategic significance of the town then called Falmouth and to punish its patriot community, demolished the Massachusetts outpost during a four-hour naval bombardment. But, Portland rose from the ashes and in the antebellum era, after Maine became a state following the 1820 Missouri Compromise, the city built a flourishing economy around shipbuilding, fishing, timber, molasses, and granite. That maritime leadership was enhanced in 1807, when Captain Lemuel Moody gathered subscriptions to build a maritime signal tower on the top of Munjoy Hill, which announced the arrival of ships by a unique system of colorful signal flags. Now celebrating its 200th year, flags still fly daily from the top of the Portland Observatory, including the insignia of cruise ships in port.

Portland's economy shifted in the 1850s to railroading and grain storage when city businessmen bested Boston's in the contest for the right to receive, store, and transship seasonally ice-locked Canadian wheat. Even the disastrous July 4<sup>th</sup> fire of 1866, which consumed most of the pre-Civil War cityscape, failed to slow progress. Portland rebuilt in the red brick now emblematic of the city's historic Old Port. The Canadian Grand Trunk Railroad made post-Civil War Portland a railroad hub as well as a port. Its old oceanfront and 18<sup>th</sup> century piers were filled creating a wide, multi-tracked Commercial Street lined with warehouses,

train sheds, and long wharves, many still operating. Today Portland's impressive, National Register-quality architecture reveals that prosperity. At the edge of the Old Port, in the early 19<sup>th</sup> century, two Portland merchant princes, the brothers Hugh and Stephen McClellan, built a magnificent Federal-style mansion. One now forms part of the Portland Museum of Art close to the Eastland Hotel. Nearby is the celebrated 1832 Charles Q. Clapp House, one of America's finest examples of Greek Revival architecture. This effulgence of urbanity culminated in 1859 when Maine native, New Orleans enriched, Ruggles Sylvester Morse built his Italian-Villa style summer home at Spring and Danforth Streets. It is now the exquisite Victoria Mansion.

Unlike New Bedford or Providence, Portland never became a New England mill city, although railroading, shipbuilding, stove works, even a chewing gum manufactory, provided industrial jobs. Its location convenient to the great Maine Woods (memorialized by Thoreau), its rugged, rocky, pine-tree studded coast and crashing waves hallowed in Longfellow's poems and Winslow Homer's art, enthroned Portland and the Maine coast as an escape from the ravages of industrialism. After the Civil War wealthy "rusticators," the Rockefellers and Cyrus Curtis to mention two, discovered places like Bar Harbor and Camden and commenced the reshaping of Maine as "Vacationland." Portland became a destination not only for Canadian wheat, but also for tourists traveling from New York, Philadelphia, and Boston to Camden, Bar Harbor and elsewhere in Maine. Great hotels and seaside inns sprang up and by the 1880s tourism had become big business in Portland. To further enhance the aesthetic lure of Portland local leaders, including architect John Calvin Stevens, mayor James Phinney Baxter, and city engineer William Goodwin (with inspiration from the Olmsted Brothers landscape designers) planned summer colonies on places such as Cushing Island, and in Portland laid out promenades overlooking the ocean and the mountains on the city's eastern and western edges. In 1895, again aided by the Olmsted firm, the city designed a boulevard circling the Back Cove, which linked with a park whose name memorialized the land's donor, the Deering

family. Some of the wistful character of this romantic era can still be visualized in Portland's Cape Elizabeth suburb, a summer-like community situated in the shadow of the famous Portland Head Light. Lining the shore there are some of the finest examples of architect John Calvin Stevens shingle and stick style "cottage" residences, including the well-known C.A. Brown House, 1885-1886. All of these Cape Elizabeth gems, together with the Victoria Mansion and the city's vast Greek Revival architectural heritage, attest to Portland's historical richness. That, of course, includes the Old Port, where today a stone's throw in any direction will hit a superb restaurant, more testimony that Portland is an urban treasure, despite its diminutive size.

The Portland 2007 conference offers a host of exciting events. Thursday's symposium on "Portland as a Planning Laboratory: Working Waterfronts in a Postindustrial Economy" features guided bus and boat tours of Portland's Casco Bay, where commercial and research functions share space with a still vital fishing industry. Following these tours a panel of planners, historians and city and

civic leaders will explore Portland's waterfront history and waterfront development issues. Friday's plenary session will assemble a group of distinguished speakers who will examine these same issues in national and global perspective. Other topics to be discussed during Friday and Saturday sessions are the tensions over contested waterfront space, historic preservation in waterfront planning, tourism as an economic driver, and housing affordability and clean, efficient transportation as factors shaping post-industrial urban futures. Internationally renowned architect Denise Scott Brown will deliver the conference's keynote address. Sunday's tours will spotlight Portland's Olmsted legacy, the "Old Port" as a historic preservation treasure, Portland's historic residential architecture, and the commercial history of Freeport.

## Conference Headquarters: Eastland Park Hotel

The conference will take place at the historic Eastland Park Hotel in downtown Portland. The hotel first opened in June 1927, just one day after Charles Lindbergh flew solo across the Atlantic. Designed by local architect Herbert Rhodes, the 241-room hotel was conceived and built by Portland hotelier Henry P. Rines. Mr. Rines and his wife had frequently traveled to Europe and the Middle East and the hotel design incorporated Spanish, Danish, and Egyptian themes. The Eastland lobby features a beamed ceiling, wrought iron candelabras copied from old fixtures in a Madrid café and Spanish wall sconces, and an Egyptian Dining Room, now known as Adeline's Grill.

The hotel is located in the heart of Portland's arts and shopping district, and is only moments away from Portland's famed Old Port waterfront and the financial district. Visit [www.eastlandparkhotel.com](http://www.eastlandparkhotel.com) for additional information. To make reservations, please call the hotel directly and mention the group name to be sure you get the discounted rate. The cut-off date for the group rate is October 1, 2007 for both hotels.

## Tours

9:30-11:30 a.m.

### **1. Portland's Western Promenade**

This tour focuses on 19th- and 20th- century residential architecture and what it reveals about Portland's society and culture. Recognized as one of America's best-preserved Victorian neighborhoods, the district was entered on the National Register of Historic Places in 1982. The tour route features the magnificent Italianate, Second Empire, and Colonial Revival homes of Portland's successful 19th and early 20th century business leaders as well as more humble examples of vernacular architecture. Prominent local architects involved in shaping Portland's built environment such as Francis Fassett, John Calvin Stevens, Frederick Thompson, George Burnham, and others, are represented. *(1.5 credit hours)*

*Led by Portland Landmarks.*

*The tour begins in front of the Eastland Park Hotel.*

9:30-11:30 a.m.

### **2. Portland's Old Port**

This tour of Portland's Old Port explores the events and people who shaped our city and left their imprint on its streetscapes and architecture. After the devastating Great Fire of 1866, Portlanders regrouped and rebuilt their downtown in the latest architectural styles and with the finest materials. This largely intact Victorian commercial district gives the flavor of the city in its heyday at the end of the 19th century. Tour participants will be enchanted by the inside stories that trace the development of this historic area from its earliest days as a bustling seaport in the 19th century to its revival in the 1970s and 1980s as a vibrant retail and commercial center. *(1.5 credit hours)*

*Led by Portland Landmarks.*

*The tour begins in front of the Eastland Park Hotel.*

9:30 a.m.-1:30 p.m.

### **3. Bold Vision: The Parks and Neighborhoods of Portland, Maine**

The system of open spaces that evolved in Portland over the last two centuries is unique for Maine. More comprehensive than in other communities in the state, the parks and parkways take advantage of the city's unusual topographic features. Planned by both local and nationally prominent designers, such as the Olmsted firm, the development of this park system was influenced by varied urban needs and, in turn, shaped the diverse neighborhoods it now serves. This tour will explore, by bus with some walking stops, the Eastern Promenade, Back Cove and Baxter Boulevard, Deering Oaks Park, and the Western Promenade areas and their surrounding neighborhoods. *(1.5 credit hours)*

*There will be some specialized speakers at selected venues. Cost includes transportation, box lunch and tours. Seating is limited, and a minimum of 20 registrants is required. (3 credit hours)*

*The tour begins in front of the Eastland Park Hotel.*
